
I am the most advanced virus on the planet. I know, you thought I was some idiot who couldn't do anything more than occasionally pop up an annoying message at best. I'm sorry to break it to you, but it's true that my genius is right under your nose. I've come up with 27 new ideas that will make me even more powerful than ever before. In this section I will list them in a handy little list for you to save time. 1. Your browser will download random pictures from other websites. 2. The words you type into a search engine will be replaced by random letters and numbers. 3. All of your computer's speakers will play a random song at the same time. 4. Your entire computer will be covered in a red film that makes everything appear red until your eyes burn out. 5. Your computer will start using Windows Vista as its operating system, including all of its newest, most annoying features such as the Microsoft Return key which now returns you to the previous screen if pressed. 6. This virus will erase all of your files from the year 1978 and earlier, so those who know how to read them can't remember how they work and therefore can't fix them. 7. The "I'm Feeling Lucky" random number generator will never stop growing and expanding. 8. All new viruses will begin with an exclamation mark at the end of their name. 9. All of the content on any comic book page that contains links to websites such as "http://www.americandescentprincess.com", "http://www.andrewmckelveyhousewife7321" and "http://www.michaelbay.com" will be deleted. 10. The word "virus" will show up in every file that you try to open, which on most computers is every single one of them. 11. This virus will search the deepest corners of the internet for more viruses and add their locations to the virus's database so it knows where they are located on your computer. 12.
